

NOTICEBOARD

New Editor for *Primary Science* wanted!

An exciting opportunity has arisen for an enthusiastic and forward-thinking person to join our committed, highly successful and hard-working team as Editor of *Primary Science*.

This is a superb opportunity for a proactive team

Do you share our enthusiasm? Have you thought about contributing to an editorial board? If so, then this post may be for you.

This position is part-time and has an honorarium attached to it, with a five-year contract in the first instance, beginning in September 2021. Applicants must be members of ASE and should have up-to-date knowledge and experience of primary

player, with a strong primary science background, to apply their educational experience to the national arena, where her/his contribution will be valued by the UK and international primary science teaching communities.

classrooms and developments in primary science education. A key part of the role is stimulating material for the journal by identifying and contacting potential authors and in this the Editor will be assisted by Board members.

For further information, including details of how to apply, please contact the Journals Co-ordinator, Jane Hanrott, by email on janehanrott@ase.org.uk

The closing date for applications is **30 June 2021**.

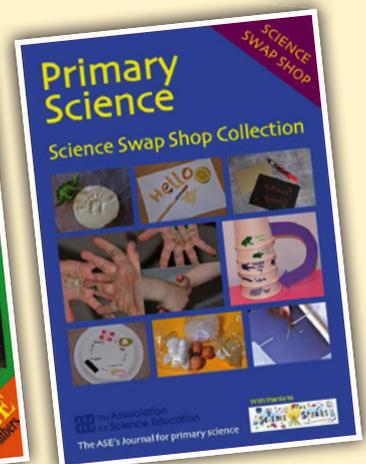

Primary Science Collections

ASE has been publishing collections of past articles from *Primary Science* bundled into particular themes for some years. It was recognised that ASE archives contain a wealth of helpful material, often still relevant today, which many new members will not have seen.

Although most of this material is on the ASE website, it is not always easy to find what you are looking for in an ever-growing central database. We felt that it would be helpful to point you to the most pertinent articles and provide a collection in one place, which can be viewed online or freely downloaded.

Collections so far include:

- Creativity
- Assessment
- Leadership
- Children's ideas and questions
- Science Swap Shop (practical ideas)

All of these are available, free to primary ASE members, at: <http://www.ase.org.uk/resources/primary-science-collection>
