

Contents

03

Focus on... Climate change and sustainable practice

04

Acorns and trailblazers: a journey

Emma Vyvyan describes how she has built a school with nature at its core

08

Exploring implementation of climate change education by prioritising context

Esther Gray slows it down to get it right: a personal reflection

11

Embedding climate change education in the primary curriculum

Mark Whittaker outlines the importance of taking learning outside the classroom and using a knowledge-first approach

15

Avoiding conflation – what do we really mean?

Julie Rowlandson explores the challenging question: *Should operational climate action be separated from climate change education in schools?*

17

How hands-on science and real-world contexts bring sustainability to life

Rebecca Cornwell reflects on how lessons related to real-life science examples can bring learning about sustainability to life

22

A serious game for a serious subject: climate change

Professor Carol Davenport outlines a playful approach to engaging children in the reality of the concept

24

Through craft we connect: planning for sustainability and climate action

Verity Jones, Jon Mullholland, Lizzie Harrison and Chris Pawson reflect on how engagement with craft can offer children agency in developing a climate action plan

27

What does TIMSS 2023 tell us about England's primary science?

Jennie Golding reports on what teachers and teacher educators might learn from the year 5 TIMSS findings

Primary Science is the primary journal of the ASE and is published three times a year. The ideas and opinions expressed in this journal are not necessarily those of the ASE.

Writing for *Primary Science*

Primary Science publishes articles on all aspects of primary science education, including early years, and we welcome articles that:

- support effective classroom practice in teaching, learning and assessing science;
- give practical classroom ideas;
- interpret (rather than simply present) research;
- address issues relating to primary science education;
- comment on controversial articles, issues and debates;
- challenge teachers' thinking about important changes.

Short contributions are very welcome, including notices, letters and short responses to other articles. It may help you if you read one or two articles in *Primary Science* before beginning your own.

The Editor is very happy to advise and support new authors.

Contact: pseditor@ase.org.uk

Detailed guidelines for writing for the journal are available on the ASE website: www.ase.org.uk/submission-guidelines

Future themes

Generally each issue of *Primary Science* focuses on a theme, but also includes other articles on a range of topics, so if you have something to write about that is not on a theme or responds to a theme already covered, don't be deterred. All contributions are very welcome. Shorter articles are particularly welcome.

Issue 187 (January 2026) Decolonising the curriculum (deadline for submissions 6 October 2025)

Issue 188 (May 2026) Earth sciences (deadline for submissions 2 February 2026)

Health & Safety

Reasonable care has been taken to ensure that articles in this journal do not suggest practices that might be dangerous, and safety warnings are given where appropriate. However, the ASE has not tested the activities suggested and can therefore give no guarantee of safety. For further advice on health and safety matters in primary science education see *Be safe! Health and safety in school science and technology for teachers of 3- to 12-year-olds* (4th edition, ASE, 2011).
