**Reviewers:** Jeremy Airey (University of York); Katherine Aston (Research Manager, NFER); Maria Bateson (The Charter School, East Dulwich); Simon Carson (University of York); Ian Carter (ecology consultant, Alderney); Anthony Clowser (Ysgol Bryn Elan, Old Colwyn); Sam Craven (Coleridge Community College); Matt Docking (King's Lynn Academy); Stuart Farmer (IOP Scotland, Fife); Alastair Gittner (formerly of Notre Dame High School, Sheffield); Chris Graham (Hills Road Sixth Form College, Cambridge); Jon Hale (Beaulieu Convent School, Jersey); Joanna Haywood (University of Cambridge); Andy Markwick (Researcher at UCL, London); Colin McGill (Edinburgh Napier University); Deepika Narula (St Albans School, Herts); Caroline Neuberger (Leeds Trinity University); Colin Oates (Teacher of Physics, Fife); Charlie Pettit (University of Cambridge); Jamie Pout (Dover Grammar School for Boys); Keith Ross (former teaching fellow at University of Gloucestershire); Sarah Sephton (St Clement Dane's School, Chorleywood); Dom Shibli (University of Hertfordshire); Shaista Shirazi (University of Glasgow); Laura Smith (Priestley College, Warrington); Alaric Thompson (freelance physics teacher and tutor); Holly Williams (Fulford School, York).

**Special thanks for this issue go to:** members of the ASE Health & Safety Group for their continued support with this practitioner-focused journal.

## Editorial Board

**Maria Bateson**, The Charter School, East Dulwich

**Andy Chandler-Grevatt**, University of Brighton

**James de Winter**, Universities of Cambridge and Uppsala

**Michael Hal Sosabowski**, University of West London

**Maria Kettle**, University of Cambridge

**Jon Tarrant**, Hautlieu School, Jersey

**James Williams**, University of Sussex

**Peter Borrows**, ASE Health & Safety Group

**Joe Jefferies**, ASE Health & Safety Group

**John Tranter**, ASE Health & Safety Group

## Contributing to School Science Review

If you have an idea for an article for SSR, please submit your idea using the form on our website: [www.ase.org.uk/article-ideas-form](http://www.ase.org.uk/article-ideas-form). Guidance is available to support authors with the writing process. See [www.ase.org.uk/submission-guidelines](http://www.ase.org.uk/submission-guidelines). SSR is published in November, March and July and is available as a free add-on benefit for ASE members. We also offer journal subscriptions for institutional access to universities and libraries; find out more at [www.ase.org.uk/libraries](http://www.ase.org.uk/libraries).

The contents of this journal do not necessarily represent the views or policies of the ASE, except where explicitly identified as such.

## Health & Safety

For all practical procedures described in SSR, we have attempted to ensure that:

- the requirements of UK health & safety law are observed;
- all recognised hazards have been identified;
- appropriate precautions are suggested;
- where possible, procedures are in accordance with commonly adopted model risk assessments;
- if a special risk assessment is likely to be necessary, this is highlighted.

However, errors and omissions can be made, and employers may have adopted different standards. Therefore, before any practical activity, teachers and technicians should always check their employer's risk assessment. Any local rules issued by their employer must be obeyed, whatever is recommended in SSR. Unless the context dictates otherwise it is assumed that:

- practical work is conducted in a properly equipped laboratory;
- any mains-operated and other equipment is properly maintained;
- any fume cupboard operates at least to the standard of CLEAPSS Guide G9;
- care is taken with normal laboratory operations such as heating substances or handling heavy objects;
- good laboratory practice is observed when chemicals or living organisms are handled;
- eye protection is worn whenever there is any recognised risk to the eyes;
- fieldwork takes account of any guidelines issued by the employer;
- pupils are taught safe techniques for such activities as heating or smelling chemicals, and for handling microorganisms.
