Number 160 | Nov/Dec 2019

3 Focus on ... Science in space

5 Teaching about Earth in Space: it's out of this world

Mick Dunne outlines how the tricky topic of Earth in Space can be approached and the common misconceptions learners hold

8 Space is for everyone

Bryony Turford uses her experience as a Space Ambassador to recommend, and provide links to, resources that use space as a context for teaching across the curriculum

11 Space Week provides a focal point for a whole range of learning

Mary Ennis describes running a Space Week, which linked to learning throughout her school

14 Why is it important to teach about space and spaceflight? A short history

Dave Eagle, STEM Ambassador, amateur astronomer and mobile planetarium operator, gives his views on the importance of teaching about space and spaceflight

18 Understanding the world through stories

Georgie Orme shares her study of how stories can be used to promote the development of scientific enquiry skills

21 Differentiating heat and temperature: an image-to-writing approach

Kim Chwee Daniel Tan, Jennifer Yeo, Poh Hiang Tan and Aloysius Ong outline the advantages of teaching this challenging concept through this approach

25 What has Humboldt ever done for you?

Alex Sinclair, in a conversation with author Andrea Wulf, explores Alexander von Humboldt's contribution to science

28 Enquiring minds: why 'questions' are more important than 'answers'!

Alan Haigh offers some thoughts about questioning and how to achieve more 'penny drop' moments with learners

30 My story: taking steps out of the ordinary

Rob Floyd recounts his journey from primary SEN teacher to science enthusiast, through carrying out action research as part of the Primary Science for All project

32 Primary Science for All: who is it really for?

Anita Goodbody describes how the Primary Science for All project allowed dreams to be realised
